

To me the "Erasmus Project" to Italy was the best thing I've ever been a part of. At first I was very scared that the other participants might not like me but as soon as I met them, all the worries disappeared. They welcomed me warmly with open arms and it was wonderful. During that one week, I made many new friends and met the most amazing people. The activities we did were very cool. Visiting the churches and museums was very interesting and I liked learning some historical facts. I also had lots of fun painting the tiles and singing Italian songs. My host family made me try many new Italian dishes and I loved them. The food, the culture, the program and the people were amazing and I would do it all over again, if I had the chance. I promised my host family to come back to Italy in the near future and I'll definitely do that. They're so sweet and generous people. I'm so grateful that I was able to take part in this project. Thank you so much!
